BEGINNER TO ADVANCED

Max Bourne by Fabiana Badie

WOODY

Where it all started: The original, long lasting Woody for flat beach sliding or bashing waves. Nobody does it better! Perfect rocker.

FOAMIE

Our best priced beginner foam core board. Extra tough plastic bottom. Best seller.

GROMMET

Put the Grom on a Grommet today. Built like an Ultra. Priced less. Comes in Fish or Standard shape. Selling like hotcakes.

ULTRA

For the smaller, lighter, hardcore skimmer, **new** lightweight Vinylester resin, lighter density foam, 5/8" thick. **New** slightly fuller shape for more distance.

BIGFOOT

Especially designed for the 190 lb. and over rider and at a great price! Thicker core 3/4". Vinylester resin is tough and light. Excellent stiffness. Higher density core optional for the really big riders.

MARK II

Re-introducing the Sandsurfer Shape, a Victoria blast from the past. One inch thick foam in a very appealing light weight glass schedule. Narrow tail for positive control. If you like to surf, this may be your baby.
